

Cell Phone shell Dataset: License Agreement

Introduction:

Since there is still no public dataset for cell phone shell quality evaluation, we invited a number of volunteers to take photos on the cell phone rear shells collected by a second-hand cell phone recycle company. Our CPS dataset includes 39,873 cell phone shell photos for different brands, including Apple, Huawei, Oppo, Vivo, and etc.

Release of the dataset:

To advance the state-of-the-art dataset in cell phone shell, this dataset is made available to the research community. Because of expanding the size of the dataset constantly, we only release a part of the dataset. To receive access to the whole dataset, for non-commercial research and other branches of related research, you must sign this document agreeing to the conditions and restrictions listed below:
